EXPERIENCE OF WORK

White Rainbow Dental clinic
Remote 01.10.2023 - present

QA Engineer

- Lead QA initiatives for digital systems used by 1000s of patients and staff.
- Own API and UI test coverage, collaborating with devs on smooth rollout of React migration.
- Audited test documentation, updating 100+ cases to reflect major architectural shifts.
- Regularly reviewed Figma designs to validate pixel-perfect UX/UI across platforms.
- Tested the mobile application on Android and iOS platforms.
- Handled user inquiries related to the mobile application.
- Developed and maintained user documentation and instructions
- Implemented and managed CI/CD pipelines to automate testing and deployment processes
- Performed SQL data validation to ensure data integrity during system migration

ACHIEVEMENTS

- Reduced post-release bugs to zero over 3 consecutive product cycles.
- Increased QA process efficiency by 10% through smarter documentation workflows
